Operator’s Manual
Read these instructions carefully and make sure you understand them before using the BRAVO 25.
INTRODUCTION

Careless or improper use of this Lawn Mower can cause serious or even fatal injury. Carefully read, understand and follow ALL instructions in this manual as well as the instructions in the included Owner’s Manual for the engine before using the BRAVO 25 Lawn Mower.

Allow only competent adults to operate this lawn mower. It is the owner’s responsibility to ensure that all operators of this mower have read and understand the content of this manual.

Common sense:
The focus of this manual is HOW to operate and service the equipment safely. It is not possible to cover every conceivable situation you can face when using this mower. Therefore use this product only in a manner described in this manual. Operation or handling the machine in any other manner can lead to serious injury or death. If a situation is not described in this manual it should be considered dangerous - and not be done.

If you are unfamiliar with this product make sure that you carefully understand how it functions and practice all operations and handling before putting the machine to use. Familiarize yourself in the presence of an experienced operator. Avoid all situations that are beyond your capability.

If you still feel uncertain about the operating procedures after reading these instructions DO NOT operate the machine until you have consulted an experienced operator.

If you have further questions you can contact - Ybravo.com, by writing or calling, see information below. You may also find a dealer close to you by searching the internet at: www.ybravo.com Ybravo.com, will willingly be of service and provide you with advice as well as help you to use your product both efficiently and safely. Additional manuals are available at NO CHARGE and can also be obtained on the internet site.

PERSONAL SAFETY EQUIPMENT

When working and operating garden equipment - approved personal safety items should be used:

- Hearing Protection
- Eye Protection
- Protective Gloves
- Protective Shoes

WARNING

CALIFORNIA Proposition 65 Warning

The engine exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

NOTICE

The engine is not equipped with a spark arrester in the muffler. It is a violation of California Public Resource Code Section 4442 to use or operate the engine on any forest-covered, brush-covered, or grass-covered land. Other states or federal areas may have similar laws. Be aware of local laws and regulations.
SAFETY DEFINITIONS

In this manual a Safety Alert Symbol ⚠ followed by the signal words WARNING and CAUTION are used to identify safety information about hazards which can result in death, serious injury and/or property damage.

These signal words mean:

⚠ WARNING indicates a hazard which, if not avoided, could result in death or serious injury.
⚠ CAUTION indicates a hazard which, if not avoided, might result in minor or moderate injury.

NOTICE indicates a message not related to personal injury.

SAFETY HAZARDS

⚠ WARNING

DO NOT MODIFY THE PRODUCT

Under no circumstances may the design of the machine be modified without the permission of the manufacturer. Always use genuine parts and accessories. Unauthorized modifications, parts and/or accessories can result in serious personal injury or the death of the operator or others. Your warranty may not cover damage or liability caused by the use of unauthorized accessories or replacement parts.

⚠ WARNING

ASPHYXIATION HAZARD

Running an engine in a confined or badly ventilated area can result in injury or death due to asphyxiation or carbon monoxide poisoning.

⚠ CAUTION

HEARING HAZARD

During the normal use of this machine, operator may be exposed to a noise level equal to or higher than 85 dB(A). Use hearing protection.

REGISTER THE PRODUCT

Please register your new lawn mower with Ybravo.com, by mailing in a copy of this page together with your address information or (better) register the mower online at the internet site:

www.ybravo.com

Registration will allow us to contact you in case of any critical updates or recalls on this machine. Product registration has been found helpful in tracing stolen equipment.

Record the following information for your records:

PURCHASE DATE: ______________________

MODEL No: ____________________________ SERIAL No: ____________________________

ENGINE MODEL: ____________ ENGINE TYPE: ____________ ENGINE SERIAL No: ____________

The lawn mower model and serial number as well as the engine model number, engine type and serial number are critical in order to obtain the correct service parts. Ybravo.com has service parts available as listed in the spare parts list. All engine parts are distributed through the Honda or Kawasaki engine dealer networks. Please refer to the engine Owner’s Manual that was included with the mower.

Mail information:

Name: ______________________________ City, State, Zip code ____________________________

Street Address: __________________________________________________________________

3
SAFETY PRACTICES FOR WALK-BEHIND MOWERS

This lawn mower is capable of amputating hands and feet and throwing objects. Failure to observe the following safety instructions could result in serious injury or death.

I. GENERAL OPERATION

1. Read, understand, and follow all instructions on the machine and in the manuals before starting.

2. Do not put hands or feet near or under the machine. Keep clear of the discharge opening at all times.

3. Only allow responsible adults, who are familiar with these instructions, to operate this machine.

4. Clear the area of objects such as rocks, wire, toys, etc., which could be thrown by the blade. Stay behind the handle when the engine is running.

5. Be sure the area is clear of other people before operating. Stop machine if anyone enters the area.

6. Do not operate machine barefooted or while wearing sandals. Always wear substantial footwear (protective shoes).

7. Do not pull machine backward unless absolutely necessary. Always look down and behind before and while moving backward.

8. Keep the operating area clear of bystanders. Stop the blade when crossing gravel surfaces.

9. Do not operate machine without the entire grass catcher, or mulch plug and discharge door, rear guards, or other safety protective devices in place and working.

11. Stop the engine and wait until the blade comes to a complete stop before cleaning the machine, removing grass catcher, or unclogging the discharge chute.

12. Operate machine only in daylight or good artificial light.

13. Do not operate machine while under the influence of alcohol or drugs.

15. Disengage the drive system, before starting the engine.

16. If the machine should start to vibrate abnormally, stop the engine and check for the cause immediately. Vibration is generally a warning of trouble.

17. Always wear approved personal safety equipment such as hearing protection, eye protection, and protective gloves when operating machine.

18. See manufacturer’s instructions for proper operation and installation of accessories. Only use accessories approved by Ybravo.com or the engine manufacturer.
II SLOPE OPERATION
Slopes are a major factor related to slip and fall accidents, which can result in severe injury. Operation on all slopes requires extra caution. If you feel uneasy on a slope, do not mow it.

1. Mow across the face of slopes; never up and down. Exercise extreme caution when changing direction on slopes.
2. Watch for holes, ruts, bumps, rocks, or other hidden objects. Uneven terrain could cause a slip and fall accident. Tall grass can hide obstacles.
3. Do not mow on wet grass or excessively steep slopes. Poor footing could cause a slip and fall accident.
4. Do not mow near drop-offs, ditches, or embankments. You could lose your footing or balance.

III. CHILDREN
Tragic accidents can occur if the operator is not alert to the presence of children. Children are often attracted to the machine and the mowing activity. Never assume that children will remain where you last saw them.

1. Keep children out of the mowing area and under the watchful care of a responsible adult other than the operator.
2. Be alert and turn mower off if a child enters the area.
3. Never allow children to operate the machine.
4. Use extra care when approaching blind corners, shrubs, trees, or other objects that may block your view of a child.

IV. SAFE HANDLING OF GASOLINE:
To avoid personal injury or property damage, use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive.

1. Extinguish all cigarettes, cigars, pipes, and other sources of ignition.
2. Use only an approved gasoline container.
3. Never remove gas cap or add fuel with the engine running. Allow engine to cool before refueling.
4. Never refuel the machine indoors.
5. Never store the machine or fuel container where there is an open flame, spark, or pilot light such as on a water heater or on other appliances.
6. Never fill containers inside a vehicle or on a truck or trailer bed with a plastic liner. Always place containers on the ground away from your vehicle before filling.
7. Remove the mower from the truck or trailer and refuel it on the ground. If this is not possible, then refuel the mower with a portable container, rather than from a gasoline dispenser nozzle.

Continued,
8. Keep the nozzle in contact with the rim of the fuel tank or container opening at all times until fueling is complete. Do not use a nozzle lock-open device.
9. If fuel is spilled on clothing, change clothing immediately.

V. GENERAL SERVICE
1. Never operate the mower in a closed area.
2. Keep all nuts and bolts tight to be sure the mower is in safe working condition.
3. Never tamper with safety devices. Check their proper operation before each use of the mower.
4. Keep the mower free of grass, leaves, or other debris buildup. Clean up oil or fuel spillage and remove any fuel-soaked debris. Allow machine to cool before storing.
5. If you strike a foreign object, stop and inspect the mower. Repair, if necessary, before starting.
6. Never make any adjustments or repairs with the engine running. Disconnect the spark plug wire and ground against engine to prevent unintended starting.
7. Never attempt to make wheel height adjustments while the engine is running.
8. Check grass catcher components and the rear discharge door frequently and replace only with Ybravo.com original parts when necessary.
9. Mower blades are sharp. Wrap the blade or wear gloves, and use extra caution when servicing them.
10. Do not change engine governor setting or over speed the engine.
11. Maintain or replace all safety and instruction labels.

CAUTION
Muffler and other engine parts become extremely hot during operation and remain hot after engine has stopped. To avoid severe burns on contact, stay away from these areas.
These labels warn you of potential hazards that can cause serious injury. Carefully read and understand them. If a label comes off or becomes hard to read, contact Ybravo.com immediately for a free replacement.

**WHAT IS WHAT**

- Blade Brake Clutch cable adjustment - page 14
- Throttle cable adjustment at the engine - page 8, 9
- Gasoline - page 9
- Gear shift lever - page 11
- HI and LO range
- Throttle control - page 8, 9
- Lower control bar, drive control - page 11
- Spark Plug - Engine Owner’s Manual
- Oil filler cap and dipstick - page 8, 9
- Cutting height adjustment - page 11
- Drive control, cable adjustment - page 11
- Upper control bar/Operator’s presence control, BBC control - page 10
- Lock for upper control bar - page 10
ASSEMBLY - SETUP

UNPACKING:
Carefully remove the mower from its packaging and check that you have all the following items:
Upper Handle complete
(2) Lower Handle tubes
Mower Bag and Mulch Plug (installed on the mower)
Tool kit
Engine Owner’s Manual and Warranty Statement

NOTICE:
If you are missing any of these items or if you are unsure of how to properly assemble this mower please contact ybravo.com by e-mail or by phone: 888.ybravo1 (888.927.2861)

Tools needed for assembly:
2 pcs 10mm wrenches
1 pcs 13mm wrench
1 pcs Needle nose pliers

STEP 1
Install the black handle tubes to the mower with the M8 carriage bolts. Do not tighten the nuts. There are three holes for the upper clamp to enable height adjustment. A good starting point is the middle hole for a medium height setting.

STEP 2
Slide the upper handle assembly into the two lower tubes. Insert the two carriage bolts and use one square washer (1) on each side of the handle tube.

STEP 3
To simplify the alignment of the handle, install the grass catcher.
Tighten the bolts in the following order:
1 - Tighten the two bolts crews on the right side tube clamps
2 - Align the left tube with the catcher (same as the right side) and tighten the clamps.
3 - Tighten the upper bolts that attaches the handle assembly to the tubes.
STEP 4
Insert the throttle cable inside the left handle tube. Install the cable into the throttle control. The cable has been adjusted at the factory (1) and the nut locked in place. However verify the proper throttle cable adjustment per the instructions for either Kawasaki or Honda engines enclosed. See “STEP 7”.

STEP 5
Install the blade brake control cable in the upper control bar. Note that there are three holes for the control cable. All Bravo 25 models uses the BBC hole position (1). Pull on the cable sheath and insert into the upper hole (2) of the handle bracket.

Follow these steps to verify proper setup of the mower equipped the KAWASAKI engine.

STEP 7 Kawasaki Engine
Verify that the throttle control is adjusted correctly as follows:
- Move the throttle control to the Choke position.
- In the Choke position the arm attached to the throttle cable at the engine should bottom out at the arrow (1).
- If needed an adjustment can be made at the throttle control.

STEP 6
Install the drive cable into the lower control bar (1) and insert the cable sheath fitting into the lower hole of the handle bracket (2).

STEP 8 Kawasaki Engine
Fill a new engine with an SAE 10W-30 engine oil.
Fill; 22 Fl.Oz (0.7 Qt. - 0.65 Liters)
If the oil filter is changed the fill volume is;
29 Fl.Oz (0.9 Qt - 0.85 Liters)
Please read the Kawasaki engine Owner’s Manual for full information.
Follow these steps to verify proper setup of the mower equipped the HONDA engine.

STEP 7 Honda Engine
Verify that the throttle control is adjusted correctly as follows:
- Move the throttle control to the **Full Throttle** position.
- In the Full Throttle position the two arms at the throttle mechanism on the engine should touch as illustrated below (1).
- If needed an adjustment can be made at the throttle control.

Following these steps for the throttle adjustment will ensure that the Honda engine performs properly for this mower. The engine speed is adjusted to approximately 3600 RPM at the factory.

**NOTICE:**
The engine speed should preferably be checked and verified with a tachometer. Normal full throttle speed of the engine should be adjusted to 3600 RPM. An authorized Honda Engine Dealer can verify and adjust the engine speed.

**STEP 8 Honda Engine**
Fill the engine with a SAE 10W-30 engine oil.
Fill: 22 Fl.Oz (0.7 Qt. - 0.65Liters)
Please read the Honda engine Owner’s Manual for full information.

**STEP 9**
Before filling the engine with gasoline - follow all instructions in this manual as well as all instructions provided in the Kawasaki or Honda engine Owner’s Manual.
Maximum fill volume:
**Kawasaki:** 1.9 Qt (1.8 Liter) - 87 octane or higher
**Honda:** 1.5 Qt (1.4 Liter) - 86 octane or higher

The engine will not operate on gasoline marketed as E-85 (85% ethanol)

**WARNING**
Taking the following precautions will lessen the risk of injury and property damage.
Use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive.
- Extinguish all cigarettes, cigars, pipes, and other sources of ignition.
- Use only approved gasoline containers.
- Never remove gas cap or add fuel with the engine running.
- Allow engine to cool a minimum of 3 minutes before refueling.
- Never fuel the machine indoors.
- Never store the machine or fuel container where there is an open flame, spark, or pilot light such as on a water heater or other appliances.
- Never fill containers inside a vehicle or on a truck or trailer bed with a plastic liner. Always place containers on the ground away from your vehicle when filling.
- Remove the mower from the truck or trailer and refuel it on the ground. If this is not possible, then refuel the equipment with a portable container, rather than from a gasoline dispenser nozzle.
- Keep the nozzle in contact with the rim of the fuel tank or container opening at all times until fueling is complete. Do not use a nozzle lock-open device.
- If fuel is spilled on clothing, change clothing immediately.
- Never overfill fuel tank. Always wipe off any spilled fuel or oil. Replace fuel cap and tighten.
CONTROLS & OPERATION

Before operating the mower for the first time, please review and understand the entire manual including all Warnings and Cautions. Even if you have operated other mowers in the past please take time to become familiar with how this mower works and practice all operations to build up your skills.

BEFORE ANY OPERATION ALWAYS:
- Inspect the mower for any visible damage or broken parts
- Check the oil level in the engine
- Make sure that when you release the upper control bar that the blade will disengage and stop. If it does not stop immediately do not use the lawn mower until the problem has been corrected. Contact Ybravo.com for advice.
- Never operate the mower with obvious damage or malfunction until the problems have been corrected.

WARNING
Never make any adjustments or repairs with the engine running. Disconnect the spark plug wire, and keep the wire away from the spark plug to prevent accidental starting.

STARTING THE ENGINE
To start a cold engine it is important to use the “Choke” position. To start a warm engine it is not necessary to use the choke.

For best performance use the “Full Throttle” position for all mowing. To verify that the engine is running at full throttle please follow the steps outlined under the set up instructions - Step 7 on Page 8 or 9.
A Ybravo.com dealer can typically also verify the correct full throttle adjustment. The engine speed should be approximately 3600 RPM without the blade engaged (no load).

BLADE CONTROL - BBC (Blade Brake Clutch)
It is a multi step process to engage the blade. Do not start the engine and the blade on an uncut lawn. If the blade is blocked by tall grass or debris it can damage the belt drive between the engine and the blade during the engagement.

1. Start the engine and let it warm up for 10 to 30 seconds.
2. Set the throttle control to the “Full Throttle” position.
3. Push the lock (1) for the upper control bar to the side.
4. Push down on the upper control bar until it rests on the handlebar (2). You will distinctly hear the blade operating - making a fan like noise.
5. When the upper control bar is released the blade should stop within 3 seconds.

Additional maintenance instructions are found on Page 14.

WARNING
NEVER insert a hand or any other object in the grass discharge chute to verify that the blade has stopped.

If the blade continues to run (no change in the noise or size of the grass bag) after releasing the upper control bar it is an indication of a malfunction of the BBC system.

If the blade did not stop during the BBC Function Test procedure or if you are unsure - Immediately stop the engine by using the throttle control on the left side of the control panel. The BBC system will require a repair before further use. Immediately contact Ybravo.com for advice. Do not under any circumstances defeat the function of the BBC system. This can cause serious injury or death.
CONTROLS & OPERATION

DRIVE CONTROL
The drive system consists of a two speed transmission and an adjustable belt drive from the engine to the transmission.

The transmission speed can be set to LO - N - HI.
HI speed is approximately 4mph - a fast walking speed.
LO speed is approximately 3mph - an average walking speed.

The shifter arm is intentionally made flexible. When the arm is locked in the LO or the HI position the transmission will automatically mesh into the gears as soon as the drive is engaged by operating the lower control bar.

ENGAGING THE DRIVE
To engage and disengage the drive system pull up on the lower control bar (1). Typically the drive will engage when the lower control bar is approximately 1 to 1.5 inches from the handle (2).

Notice
Due to wear, the drive engagement position of the lower control bar can change. If the distance between the lower bar and the handle (2) is less than a 1/4 inch when the mower starts to drive make an adjustment on the red knob located below the engine fuel tank (3).

If needed turn the red knob 2 turns clockwise. Verify the drive position of the control bar by operating the mower. If needed repeat the adjustment.

HEIGHT ADJUSTMENT
Each wheel can be adjusted individually to a specific cutting height from 1 inch to 4.5 inch. Notice: It is only possible to move the adjustment on one side 2 - 3 steps each time.

Moving the front wheel height adjusters forward raises the cutting height. Moving the rear wheel height adjusters towards the rear of the mower raises the rear cutting height.

Always adjust the height adjusters to the same position both in the front and the rear for best cutting results.

WARNING
Never readjust the cutting height while the engine is running. STOP the engine. Never lift the mower by placing your hand or fingers under the edge of the mower deck.

MODES OF OPERATION
This mower is approved to be used in two different operational modes:

1 With a grass catcher in place
An original equipment Ybravo.com catcher has been tested to be used with this mower. It is important to always inspect the catcher for deterioration. If the material is ripped or worn the bag shall not be used.

2. With the mulch plug installed
If the mulch plug is installed ensure that the rear door can close completely.

WARNING
Do not operate the lawn mower without the mulch plug or the Ybravo.com grass catcher in place. Never attempt to operate the mower with the rear door removed, damaged or propped open.
### MAINTENANCE

<table>
<thead>
<tr>
<th>Maintenance - Service Interval</th>
<th>Procedures</th>
</tr>
</thead>
</table>
| Before each use               | Check the engine oil level.  
Check the operation and integrity of the BBC control system (see page 10).  
Inspect the mower blade for wear or damage.  
Inspect the cables for any wear or damage.  
Inspect the grass catcher for any damage.  
Check for any loose or missing screws or damaged parts.  
Clean under the lawn mower deck (after usage). |
| First 20 Hours or Within 4 weeks | Change the engine oil (see page 13).  
Check the throttle cable adjustment (see pages 8-9). |
| Every 50 Hours or every 2 months | Lubricate the pivot arms on the control panel with oil.  
Check the function and adjustment of the Blade Brake Clutch cable (see page 14)  
Check and clean the engine air filter (see the engine Owner’s Manual) |
| Every 100 Hours or every 4 months | Change the engine oil (more often in dusty conditions).  
Check the spark plug.  
Clean the engine with compressed air. |
| Every 200 Hours or every 8 months | Replace the paper air filter (more frequently in dusty conditions).  
Replace the spark plug.  
Adjust the valve clearance. |

In addition to this schedule follow the Maintenance Schedule in the Honda or Kawasaki Owner’s Manual.  
This maintenance schedule assumes daily use by a landscape company.  
One Month of use is assumed to be 15 to 20 days of operation.

### NOTICE

Several of the operations described in this Maintenance section involves placing the mower on its right side.  
To avoid spills of oil and gasoline always:  
- Place the mower on a hard surface such as a concrete driveway or a garage floor.  
- Never place the mower on its side when there is gasoline in the tank - do the service of the mower when you have run out of gasoline during normal operation.  
- Always make sure that the Oil Filler Cap is tightened.  

Any spillage of oil or gasoline can be extremely flammable and explosive and under certain conditions can cause serious personal injury and property damage.

### CLEANING THE MOWER

We do not recommend using a garden hose to clean the mower. The buildup of moist grass, fertilizer and water can cause extreme corrosion damage to many parts of the mower and the engine.  
**Never use a Pressure Washer:**  
The use of a pressure washer can force water and moisture into ball bearings and engine parts and cause substantial damage.  
- Clean the underside of the mower by scraping any build-up of grass and trash.  
- Clean off the outside of the engine and the top of the mower with compressed air. Any accumulation of debris under the belt cover can typically also be removed with compressed air without removing the protective belt cover.  
- Wash the Grass Bag with a garden hose frequently. The holes that allows the grass bag to breathe will eventually clog with dirt. A clogged bag will not collect the grass clippings effectively. Do not install and use a wet grass catcher. It will plug prematurely.
Blade Maintenance

For best results, the mower blade must be kept sharp. Always replace a bent or damaged blade.

Removing the blade

1. Disconnect spark plug wire from spark plug and place wire where it cannot come in contact with plug.
2. Turn lawn mower on its right side. (Make sure air filter and carburetor are up).
3. Use a wood block between blade and mower deck to prevent blade from turning when removing blade bolts.
   
   **NOTE:** Protect your hands with gloves and/or wrap the blade with a heavy cloth.
4. Remove blade bolts by turning counter-clockwise with a 11/16" (17mm) wrench or socket.

Installing the blade

1. Position the blade with the bent corner of the blade (sail) pointing towards the deck. Install the blade bolts.
   
   **Important:** Blade bolts are heat treated. If a bolt is worn or damaged replace it only with a bolt available from Ybravo.com.
2. Use a block of wood between blade and mower deck and tighten the blade bolts. Always use a torque wrench. The recommended tightening torque is 30 to 35 ft. lbs. (40 to 45 Nm)

**WARNING**

Use only a replacement blade approved by Ybravo.com. Using a blade not approved by Ybravo.com is hazardous. It can damage your mower and cause serious personal injury.

A worn or damaged blade can break and parts of the blade could be thrown into the operators or bystanders area, resulting in serious personal injury or death.

Inspecting the blade

Carefully examine the blade for straightness, damage and abnormal wear. In some areas abrasive sand and dust can wear away the metal of the blade - see illustration.

Sharpening the blade

File the top side of the blade (1) and maintain the original angle of the cutting edge. Maintain the radius where the cutting edge ends. Always remove the same amount of material from both ends of the blade. This ensures that the blade stays balanced.

If sharpening is done with a grinding stone the blade should always be balanced using a blade balancing device. A blade balance tool is available from Ybravo.com or most lawn and garden dealers, and hardware stores.

If the blade shows wear or cracking at the edge where the blade is bent up (3) it must immediately be replaced.

Engine Oil Change

NOTICE: Before tipping lawn mower on its right side to drain oil, empty fuel tank by running engine until fuel tank is empty.

1. Disconnect spark plug wire from spark plug and place wire where it cannot come in contact with plug.
2. Remove oil filler cap/dipstick.
3. Tip lawn mower on its right side as shown and drain oil into a suitable container. Rock lawn mower back and forth to remove any oil trapped inside of engine.
4. Wipe off any spilled oil from lawn mower or side of engine.
5. Fill engine with oil. Slowly pour oil down the oil fill spout into the engine. Use an SAE 10W-30 oil (22 Fl.Oz - 0.65 Liter without oil filter, 29 Fl.Oz - 0.85 Liter with oil filter replacement). See engine Owner’s Manual for complete information.
6. Wait one minute to allow oil to settle. Use gauge on oil filler cap/dipstick for checking level. Insert dipstick into the tube and rest the oil fill cap on the tube. DO NOT thread the cap into the tube when taking the reading.
7. Continue adding small amounts of oil and rechecking the dipstick until it reads full. DO NOT overfill, or engine will smoke on startup.
8. Always be sure to retighten oil fill cap/dipstick before starting engine.
9. Reconnect spark plug wire to spark plug.
MAINTENANCE

BLADE BRAKE CLUTCH CABLE ADJUSTMENT
It is recommended that the adjustment of the Blade Brake Clutch (BBC) cable is checked at the minimum every 50 Hours or within each 4 weeks of operation. If not properly adjusted the brake might not work as designed. This adjustment pertains to a belt that has been used a minimum of 2 hours.

Removing the belt guard.
1. Disconnect spark plug wire from spark plug and place wire where it cannot come in contact with the spark plug.
2. Remove the three screws for the plastic belt guard.

Check the adjustment of the spring tension.
1. Without any tension on the spring it measures approximately 2" (51 mm) per below illustration.

2. Without starting the engine engage the BBC as described on page 10.

3. Measure the stretched out length of the spring. It should measure between 2 5/16" (58 mm) to 2 7/16" (62 mm). If necessary please adjust the cable by loosening the nuts (1).

4. After making any cable adjustment tighten the nuts and replace the belt guard.

5. Start the engine and verify the BBC function according to the procedures on page 10.
SECTION 1: LIMITED WARRANTY

Ybravo Texas, LLC (Ybravo) warrants the original purchaser of Ybravo branded product to which this warranty applies (the “Product”) that the Product shall be free from defects in material and workmanship from the date of purchase for the applicable “Warranty Schedule” of the Product as set forth below. Additional limitations are described in Section 2 through Section 6, Inclusive.

<table>
<thead>
<tr>
<th>Product Category</th>
<th>Residential Use * Limited Warranty</th>
<th>Commercial Use Limited Warranty</th>
<th>Rental Use Limited Warranty</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

* Residential Use means use of the product at one location. Use of the product at multiple locations is considered Commercial Use.
** Excludes components which are part of engine systems manufactured by third party engine manufacturers for which the purchaser has received a separate warranty with product at time of purchase.

SECTION 2: YBRAVO’S OBLIGATIONS UNDER THE WARRANTY

Ybravo will repair or replace, at its option, any part proven to be defective in material or workmanship under normal use during the applicable warranty period; the labor to repair defective part will be covered for a period of one (1) year for Commercial Use Products, and a period of two (2) years for Consumer use products; subject to the limitations and exclusions listed in Section 3 and Section 4.

SECTION 3: ITEMS NOT COVERED BY THIS WARRANTY

The following items are not covered by this warranty:

1) Cost of adjustments, and/or regular maintenance items which become worn through normal use, including, but not limited to: belts, blades, blade adapters, cables, bags, clutches.
2) Natural discoloration of material due to ultraviolet light.
3) Engine and drive systems not manufactured by Ybravo; these items are covered by the respective manufacturer’s warranty as provided in writing with the product information supplied at the time of purchase; all claims must be sent to the appropriate manufacturer.
4) Mowing decks with sand abrasion
5) Emission Control System components necessary to comply with CARB-TIER II and EPA regulations which are manufactured by third party engine manufacturer.

SECTION 4: EXCEPTIONS AND LIMITATIONS

This warranty shall be inapplicable to defects resulting from the following:

1) Accident, abuse, misuse, negligence and neglect, dirt, abrasives, moisture, rust, corrosion, or and adverse reaction due to incorrect storage or use habits.
2) Failure to operate or maintain the unit in accordance with the Owner’s/Operator’s manual or instruction sheet furnished by Ybravo.
3) Alterations or modifications that change the intended use of the product or affects the product’s performance, operation, safety or durability; or causes the product to fail to comply with applicable laws; or:
4) Additional damage to parts or components due to continued use occurring after any of the above.

REPAIR OR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS THE EXCLUSIVE REMEDY OF THE PURCHASER. YBRAVO SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THESE PRODUCTS EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW. ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THESE PRODUCTS IS LIMITED IN DURATION TO THE WARRANTY PERIOD AS DEFINED IN THE LIMITED WARRANTY STATEMENT. YBRAVO RESERVES THE RIGHT TO CHANGE OR IMPROVE THE DESIGN OF THE PRODUCT WITHOUT NOTICE, AND DOES NOT ASSUME OBLIGATION TO UPDATE PREVIOUSLY MANUFACTURED PRODUCTS.

Some states do not allow the exclusion of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary by state.

SECTION 5: CUSTOMER RESPONSIBILITIES

The product must exhibit reasonable care, maintenance, operation, storage and general upkeep as written in maintenance section of the Owner’s/Operator’s manual. Should an operational problem or failure occur, the product should not be used. Failure caused by continued use is not covered by warranty. Product should be delivered, at owners expense, as is, to an authorized Ybravo dealer for evaluation. Proof of purchase, as explained in section 6, rests solely with the customer.

SECTION 6: PROCEDURE TO OBTAIN WARRANTY CONSIDERATION

It is the Owner’s and Dealer’s responsibility to make certain that the Product Registration was completed on-line at www.ybravo.com. Product registration should be completed within ten (10) days from the date of purchase in order to confirm the warranty and to facilitate post-sale service. Proof of purchase must be presented to the authorized Ybravo dealer in order to obtain warranty service. This proof of purchase must include date purchased, model number, serial number, and complete name and address of the selling dealer. To obtain the benefit of this warranty, the product believed to be defective must be delivered to an authorized Ybravo dealer in a timely manner, no later than thirty (30) day from date of operational problem or failure. The product must be delivered at the owners expense. Downtime, pick-up and delivery charges are not covered by this warranty. An authorized Ybravo dealer can be located by calling 1-888-YBRAVO-1 or by visiting www.ybravo.com. Subject to change without notice.
